

METRO *B Line*

Metro Transit is developing plans for the METRO B Line, which will provide fast, frequent service along the Route 21 corridor every 10 minutes during most of the day and evening.

The B Line could extend to downtown St. Paul. If it does, the map below shows potential locations for stations on Selby Avenue.

Example BRT Station

Northbound METRO A Line Station at Snelling Ave. and St. Clair Ave. B Line stations will look and feel similar to A Line stations.
